

MOTOR ELECTRIC RETRACTION PANIC

The Motorized Latch Retraction option incorporates a powerful and efficient motor to unlatch the exit device. Motor-powered latch retraction also provides a quieter operation than solenoid options.

Factory calibrated with optional field calibration

Audible chirps for calibration confirmation and bar binding

Robust linkage mechanism for extended operation

Motor-driven latch and bar retraction

Available for 30" – 48" doors

850 mA during retraction and 370 mA maintained in dogged hold position

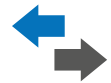

Requires 2A at 24 VDC regulated/filtered power supply

Continuous or intermittent use

Configured for fail-secure. In the event of a power failure, the exit device defaults to latched condition

Available for panic and fire exit hardware

RIM MOTOR LATCH RETRACTION

Part #: ADR8801MLR-36-24V
Hot #: 170659

CONCEALED VERTICAL ROD MOTOR LATCH RETRACTION

Part #: ADR8611MLR-36-24V
Hot #: 168518
