FALCON LCN

LCN and Falcon offer low energy automatic operators with proven real-world performance. By choosing these operators, you invest in a trusted solution that does not require the hassle or expense that coincides with a service contract.

4600 Series: The 4630 and 4640 Series operators are designed primarily for manually opening applications that sometimes require an automatic opening. The 4630 and 4640 Series are best for multi-door applications and provide easy access for the elderly and people with disabilities.

9500 Series: The low-energy electromechanical Senior Swing Series operators are LCN's heaviest-duty version for high-abuse and high-traffic areas. Push 'N Go non-switch activation takes over when a pedestrian manually opens the door to 5°, then holds the door fully open for 1-30 seconds, depending on the time delay.

8200 Series: The 8200 Series automatic operator provides smooth door control for openings that require flexible accessibility and Americans with Disabilities Act (ADA) compliance. It enhances ease of use in various applications, such as assisted living and Multi-Family facilities.

6400 Series: The LCN 6400 Compact Series low energy automatic operator can help your facility meet basic needs related to accessibility and touchless access on interior openings. The intuitive user interface allows you to set opening speed, power boost and hold open time.

Receive a \$50 or \$100 Home Depot gift card with each qualifying operator purchased in February and March 2023.

Applies to LCN 4600 Series, LCN 6400 Series, LCN 9500 Series and Falcon 8200 Series
